

Gamalliel Sharon Saragih

IT System Analyst

Jakarta, Indonesia | gamallielsaragih@gmail.com | [\(+62\) 8999190198](tel:+628999190198)

PROFESSIONAL SUMMARY

System Analyst with 3+ years of experience translating complex business requirements into scalable digital solutions. Skilled in requirement analysis, business process modeling, documentation, and stakeholder collaboration. Passionate about AI-powered products, automation, and building modern systems that improve operational efficiency and user experience.

CORE SKILLS

System Analysis: Requirement Gathering & Analysis, Business Process Modeling (BPMN), System Design, Workflow Analysis, UML & ERD Modeling, Functional & Technical Documentation, User Flow & Process Optimization.

Technical: JavaScript, Next.js, SQL, PostgreSQL, Relational Databases, REST API Integration.

Documentation & Testing: Business Process Analysis, Software Requirement Specification (SRS), Functional Specification Document (FSD), Standard Operating Procedures (SOP), User Acceptance Testing (UAT), Test Case Design & Execution.

Tools: Git & GitHub, Postman, Figma, DBeaver, Microsoft Visio, Draw.io, Lucidchart, Mermaid.js.

Languages: Indonesian (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

PT. Toyota Motor Manufacturing Indonesia

Karawang, Indonesia.

IT System Analyst

August 2025 - May 2026

- Gather requirements from Production, Warehouse, and Logistics teams to support manufacturing system enhancements and operational efficiency initiatives.
- Analyze and propose improvements for Warehouse Ordering System, Material Management, and Inventory Workflows to optimize business processes.
- Conduct User Acceptance Test (UAT) and validate system functionality against manufacturing operational standards.

- Support system integration initiatives with supplier platforms and maintain technical documentation for system changes and enhancements.
- Supported manufacturing workflow optimization initiatives across Production, Warehouse, and Logistics operations.

PT. Kalibesar Raya Utama

Jakarta, Indonesia.

IT System Analyst

April 2024 - May 2025

- Served as the primary liaison between business stakeholders and development teams for the company's ERP platform, Brokapp.
- Gathered and translated business requirements into functional solutions aligned with operational and strategic objectives.
- Collaborated with the HR division to design workflows and system requirements for the company's Learning Management System (LMS).
- Conducted UAT, monitored SDLC progress, and delivered project updates to stakeholders and management teams.
- Reduced manual bank receipt processing efforts through OCR-based automation using Python.

Bangkit Academy

Jakarta, Indonesia.

Capstone Project Advisor

August 2023 - February 2025

- Mentored 5 capstone project teams throughout the end-to-end software development lifecycle.
- Provided strategic and technical guidance on problem analysis, solution architecture, and implementation approaches aligned with industry practices.
- Reviewed project deliverables and delivered structured feedback to improve solution quality, feasibility, and business impact.
- Assisted teams in requirement analysis, project scoping, and task planning to ensure clear project direction and execution.
- Guided capstone teams in improving project feasibility, solution clarity, and implementation quality.

PT. Asuransi Sinar Mas

Jakarta, Indonesia.

IT System Analyst

April 2022 - April 2024

- Analyzed business requirements and translated them into structured system specifications for development and implementation teams.
- Led system and API integration initiatives to ensure accurate and real-time data synchronization across applications.
- Prepared functional documentation, coordinated UAT activities, and supported stable and timely production releases.
- Reduced manual input errors and accelerated insurance policy and claim processing workflows through process automation initiatives.

SELECTED PROJECTS

Aluria AI

<https://aluria-ai.vercel.app>

Founder & Product Builder | AI-Powered System Analysis Platform

- Building an AI-driven platform designed to streamline System Analysis workflows through automated documentation and intelligent requirement generation.
- Developed features for business process flow generation, structured requirement analysis, and AI-assisted documentation workflows.
- Focused on reducing repetitive manual processes and improving collaboration between business and technical teams.
- Involved in product planning, feature design, workflow architecture, and overall product strategy.

Chamjo

<https://chamjo.design>

Founder & Creative Developer | UX Research & Benchmark Platform

- Built a UX research platform that curates real mobile app screenshots from various countries to help designers and product teams analyze regional user experiences and interface patterns.
- Developed a searchable library of local app flows, enabling users to benchmark competitor experiences and gather UI/UX inspiration efficiently.
- Focused on uncovering hard-to-access user flows such as payment, banking, and delivery experiences across different regions.
- Led product planning, feature strategy, content structuring, and overall user experience direction for the platform.

EDUCATION

Institut Teknologi PLN

Jakarta, Indonesia.

Bachelor of Informatics Engineering

September 2017 – February 2022

GPA: 3.43 / 4.00

Bangkit Academy

Jakarta, Indonesia.

Cloud Computing Learning Path

February 2021 – July 2021

- Completed an intensive industry-led learning program focused on cloud computing, software engineering fundamentals, and collaborative capstone development.
- Final Grade: 90 / 100

CERTIFICATIONS

1. Bangkit Academy Certificate of Completion – Final Score: 93/100
2. Google IT Automation with Python – Coursera (2021)
3. Architecting with Google Compute Engine – Coursera (2021)
4. Microsoft Technology Associate: Database Fundamentals – Score: 87/100
5. TOEFL Prediction Test – Score: 583
